

### **Spacious bowls**

Thanks to our innovative manufacturing techniques, all GROHE sinks feature bowls with a generous depth of min. 16cm, maximizing space for washing large pots with ease..

### **Waste fitting with remote control**

GROHE sinks are equipped with a 3.5" waste fitting and practical strainer plug that prevents solids and leftovers from flowing away with the waste water. The steel cap available on some models adds elegance to the bowl and hides any residue collected in the underlying basket.

### **Siphon included**

For a quick and hassle-free installation each sink comes with an under-sink siphon complementing the scope of delivery and guaranteeing an ALL IN ONE solution.

### **Water drainage**

Drainage from the bowl's base and drainers is an important feature, always well cared for on GROHE sinks. In the squared-out, flat-bottomed sinks, good drainage is ensured by the elegant diamond-shaped creases that make the water flow away more easily.

# SINK AND TAP IN PERFECT HARMONY

To make it even easier to pick the right sink and tap for you, we've also created four prepacked sink and tap bundles, so you can buy your ideal sink and tap together, hassle-free. Encompassing our most popular lines, you can select a Bau, Eurosmart or Conetto sink bundle, making design, purchase and installation an even smoother, swifter process.

**31 562 SD0**

# KITCHEN SOLUTIONS

GROHE EVERYDAY KITCHEN PRODUCTS

Available until 31st December 2019

# FEEL THE BENEFITS INNOVATIVE FEATURES AND FUNCTION

We can't claim to make washing up a joy, but thanks to the smart, useful features of every GROHE sink, we certainly believe that we can make your sink somewhere you are happy to spend some time. With a GROHE sink, cleaning is easier, draining the bowl can be done remotely, and even the sound of the water running is minimised. Just select your ideal size and style - installation is effortless and the benefits speak for themselves.

## Pre-punched tap holes

Each GROHE sink comes with two pre-punched tap holes, meaning no additional tools are required and some sinks are reversible and can be installed as either left or right handed options.

## Overflow

The overflow available on all GROHE sinks, avoids any spillage of water in case the taps are inadvertently left open. The perimetric solution available on some models improves the lock, thanks to its squared-out and essential shape.

# NEW GROHE RED THE NEW HOT SPOT IN YOUR KITCHEN

Never wait for the kettle to boil again. With the innovative GROHE Red system you can fill anything from a mug to a large pot, with kettle-hot water in an instant – and all direct from your kitchen tap.

With GROHE Red you still have your standard kitchen mixer, but separate push buttons provide kettle-hot water on tap.
